

BluBag™ Industrial Range

The industrial range of products has been designed for use in situations where large quantities of drinking water are required, and a strong, reliable container is needed to withstand rugged conditions.

The outer layer of each BLUBAG™ is made from strong, UV-resistant PVC and provides durability for use onsite and in harsh terrain. Industrial products are available in a range of sizes from 100 litres to 20,000 litres in various configurations. BLUBAGs™ provide a cost-effective, portable solution that can be deployed in almost every location.

BLUBAGs™ are very easy to use and do not require any training. When required for use, they can be unfolded, filled up and they are ready for use within minutes. When not used, they are simply folded and stored until the next time they are needed.

Replacing the insert only takes a few minutes and does not require any tools or other equipment. The insert is placed within the outer bag and the taps are then connected. At no time the water comes into contact with the outer layer.

Applications

- Large remote projects
- Site offices and facilities
- Exploration camps
- Emergency situations
- Water cartage using flat bed trucks
- Water storage
- Events
- Bush fire protection
- Cyclone preparation

Sizes and Dimensions

Size (Litres)	Product Description	Length (cm)	Width (cm)	Height* (cm)
100	100 litre bladder with food-grade insert and tap, blue, one inlet	100	85	12
200	200 litre bladder with food-grade insert and tap, blue, one inlet	130	90	18
500	500 litre bladder with food-grade insert and tap, blue, one inlet	150	150	20
1,000	1,000 litre bladder with food-grade insert and tap, blue, one inlet	175	175	30
2,000	2,000 litre bladder with food-grade insert and tap, blue, one inlet	200	200	50
3,000	3,000 litre bladder with food-grade insert and tap, blue, one inlet	300	200	50
5,000	5,000 litre bladder with food-grade insert and tap, blue, one inlet	500	200	50
7,000	7,000 litre bladder with food-grade insert and tap, blue, one inlet	700	200	50
10,000	10,000 litre bladder with food-grade insert and tap, blue, one inlet	1,000	200	50
15,000	15,000 litre bladder with food-grade insert and tap, blue, one inlet	1,500	200	50
20,000	20,000 litre bladder with food-grade insert and tap, blue, one inlet	2,000	200	50

* Height dimensions are approximate and depend on quantity of water in the BluBag™

Specifications

Parameter	Value
Outer Layer	
Fabric Type	PES 1100 Dtx (PES 1000Den)
Polymer	PVC
Total Weight	ASTM D 751 – 610 gr/m ² (19 oz./yud ²)
Breaking Strength (STRIP) ASTM D 751 Procedure B	285/275 lb./inch (250/230 kg/cm)
Inner Layer	
Bag	Inner ply LLDPE Transparent 2 x 65 μ
Spout	LDPE Transparent 2" BSP W.D.
