

## JerryBag™

The JerryBag™ is an innovative new solution for water storage aimed at the 4WD/Camping market.

Current 4WD water-storage solutions are mostly based on rigid tanks. Water storage in rigid tanks requires special hookup, takes up storage space when empty and requires maintenance. they are typically characterised by:

- Poor water quality
- Bad taste and flavour after just several uses
- Practically impossible to clean

The JerryBag™ bladder is based on a proprietary double-layer structure. The inner liner is replaceable, food-graded, and complies with all Australian Standards for food packaging.

## Benefits

- Always fresh and great tasting water - the JerryBag™ has a replaceable food-grade insert
- No maintenance or cleaning is required – just replace the inner insert
- Multipurpose – can be used for either water or diesel. Just use different insert
- Super durable – the JerryBag™ has been tested and proven for military use.
- Easy hookup – fits any standard Jerry-can holder or any other inner or outer vehicle hookup arrangement
- Minimal storage space – When empty, storage space reduces by approximately 80%
