

## BluBag™ Leisure Range

The leisure range of BluBags™ features a polyester outer layer and is available in various sizes from 40 litres to 200 litres. Leisure bags can be carried using the easy-grip handles and can be laid flat on the ground or countertop for convenient use.

BLUBAGS™ are particularly useful from a health and safety standpoint. They are ideal for providing fresh water to small groups of people and offer a cost-effective and environmentally friendly solution for water portability.

BLUBAGS™ are very easy to use and do not require any training. When required for use, they can be unfolded, filled up and they are ready for use within minutes. When not used, they are simply folded and stored until the next time they are needed.

Replacing the insert only takes a few minutes and does not require any tools or other equipment. The insert is placed within the outer bag and the taps are then connected. At no time the water comes into contact with the outer layer.

## Applications

- Home and outdoor use
- Camping and 4WD
- Boating and fishing
- In-vehicle water supply
- Long road trips
- Sports and events
