

## BluBag™ Solutions for Camping and Boating

### The Problem

Camping, caravanning and boating are popular recreational activities. When going out into the bush, or out to sea, it is essential that an adequate supply of water is available for use and for emergency situations should they arise.

Today, most water containers for such activities are hard body plastic tanks such as jerry cans. They are rigid, take up much needed space and require regular cleaning. After a short while, users complain of the water having a plastic flavour. The same applies to onboard containers found in caravans and boats.

### The Solution

The BluBag™ portable drinking water solution provides an innovative, cost-effective and easy to use solution that can be used in every camping, caravanning and boating application.

With their flexible shape, they can be stored in out-of-the-way areas in caravans and boats and easily moved as required. When not required they are folded away and do not take much storage space. Caravan and boat users can use their onboard tanks for showering and cleaning, while the water kept in BluBags™ can be used for drinking and cooking.

### Benefits

- Supplied with standard connections - just connect and fill.
- Zero maintenance and no need for cleaning.
- Folds away and requires very little storage space.
- Reusable - easily restored to full functionality after use.
- Easily transportable and does not require water trucks.
